

RFID INTEGRATION

RFID Express Encoder

- Simple encoding from 1D or 2D barcode
- Unique ID is encoded on embedded RFID tag
- Quick training for on-site encoding process
- Barcode scanning is activated once base unit recognizes RFID tag
- Onboard audible and visual indicators of successful or unsuccessful encoding
- An average of 2-3 seconds to encode
- Battery operated

RFID Badge Holder

- Reliable & secure 3x1.75" inch RFID tag from Texas Instruments
- Securely embedded into badge holder preventing removal
- Standard plastic 3x4" badge holder
- RFID tag contains the same attendee demographics as a standard 2D barcode
